The game is what you would expect from a Mahjong game.

I do not recommend it because there are no options in game (nothing like sound, screen options...) and it seems to not be 100% working, as the Travel game mode got stuck in the screen of the first mahjong table, forcing me to alt+F4 quit it.. Level one was very simplistic but was ok. But I see from reading the community hub that there is a bug that prevents level two "Travel" from launching, and so that's it. End of game. It's been two months without an update to fix the bug.
