NewsBar for  
iPad & iPhone has arrived!

[News Reader For Mac Sierra](#)

---

**Free Download**

---

That lack of file import sets the bar for RSS Reader: it's simple. Just installed Sierra and wanted to see what works So far from my testing the below work for me.. MOD EDIT: This is a wiki post, which is editable by anyone with the appropriate rights.

The simply-named RSS Reader is a \$1.99 app that lives in the Mac's menubar The application doesn't support OPML import (or export), but searches for feeds once a web address is entered.
